Strong immunity keeps your pet healthy and free from infection

A Powerful Antioxidant, Antiviral and immunobooster product

28 % of puppies get parvoviral infection even after vaccination

✓ 52% of effectiveness in dogs that had already reached the advanced stage of viral infection

✓ No side effects

✓ Increases body weight

✓ Improvement in oxidative stress and immunity

✓ Reduces lipid peroxidation and modulates cytokine secretion

• Effective antiviral

It does not allow virus attachment to the cell and inhibits its replication in the cytoplasm.

• Highly recommended for neonates and pregnant females

• Powerful immunomodulator

• Hepatoprotector

• Appetite stimulant

• Reduces oxidative stress

A Powerful Antioxidant, Antiviral and immunobooster product

- Supplementary food consisting of antioxidants, vitamins, trace mineral, and a component extracted from liquorice root (glycyrrhizinic acid).
- It is specially designed to supplement immune defenses against diseases causing immunodeficiency.
- It is well known that the supply of nutrients with antioxidant character is essential to ensure the proper functioning of the immune system.
- Because of the high antioxidant activity of components, the products provides strong support in the mitigation and alleviation of viral processes.

DOSE:

1 ml per 5 kg
of body weight
every 12 hours.
